Shashank Ravishankar Naik

Bengaluru, Karnataka, India

+91-9483136237 — shashanknaik39037@gmail.com — LinkedIn — GitHub — Leetcode

PROFILE

Aspiring Software Developer skilled in building systems using **Node.js**, **Express.js**, and **MongoDB**. Hands-on experience with containerization (**Docker**) and cloud deployments (**AWS EC2**). Strong foundation in **DSA**, **DBMS**, and **computer networks** with proven contributions to hackathons and internships.

EDUCATION

Dayananda Sagar College of Engineering, Bengaluru

Bachelor of Engineering (CSE) — CGPA: 8.98

4th Year, 2022-2026

Siddartha College, Bhatkal

Pre-University (PCMB) — Percentage: 93.33

2020-2022

Anand Ashram High School, Bhatkal

SSLC (10th) — **Percentage: 92.64**

2019-2020

TECHNICAL SKILLS

• Languages: C++, Java, JavaScript

- Frameworks: Node.js, Express.js, Mongoose
- Technologies: MongoDB, MySQL, Docker, JWT, AWS EC2, Render, Postman, GitHub
- Core CS: OOPS, DBMS, Data Structures & Algorithms, Computer Networks, REST APIs

PROJECTS

DeepDetect - AI-Powered Deepfake Detection

MERN + TensorFlow + FastAPI

- Built an AI-based platform to detect deepfake images using a MERN stack and a scalable model inference system.
- Users can upload images via drag-and-drop, view detection status with real-time alerts, and monitor usage through an admin dashboard.
- Designed backend in **Node.js** + **Express** with authentication, secure APIs, and **Razorpay** integration.
- Used **JWT** as dynamic API keys to enable secure, pay-per-use model access.
- Implemented a deep learning model in **TensorFlow** with multiple **Conv2D**, **MaxPooling2D**, and **Dense layers** for binary classification of deepfake images.
- Containerized the **FastAPI** model service using **Docker**, deployed it on **AWS EC2**, and integrated with the **Node.js** backend for scalable inference in production.
- Deployed frontend/backend on **Render** with separate hosting of the model service to ensure high performance and modular scaling.
- Links: Live Demo GitHub Repo

EXPERIENCE

Kacklewalls Nutrition Pvt Ltd, Bengaluru

Aug 2024 - Nov 2024

Backend Developer Intern

- Successfully completed a 3-month internship as a Backend Developer, contributing to the backend development of a **B2C website** now live in production.
- Played a pivotal role in developing and maintaining backend features for the **B2B website**, such as creating and updating outlets, customers, and delivery drivers.
- Worked on backend functionalities using **Express.js**, including order assignment to the nearest outlet and complex data aggregations.
- Assisted in developing and integrating **REST APIs** with **MongoDB**, contributing to smoother backend functionality.

CERTIFICATIONS AND ACHIEVEMENTS

- Runner-Up National Hackathon (MITB ACM): Secured 2nd place with AI/Agritech solution; collaborated with industry experts and Codebasics founders.
- NPTEL Advanced Computer Networks (Silver Medal): Covered routing and transport protocols; recognized by India's premier online learning platform.
- Udemy Node.js, Express, MongoDB (42 hrs): Full backend bootcamp on REST APIs, MongoDB modeling, and deployment.
